3

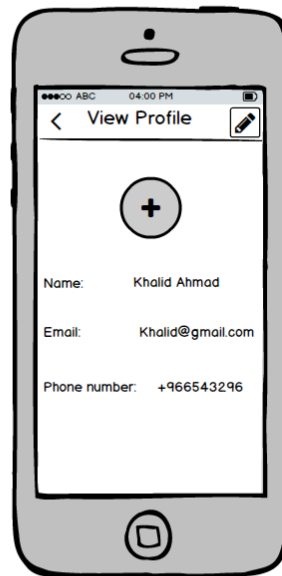

Once driver press on the pen, he can edit his profile

this could be on the same page.

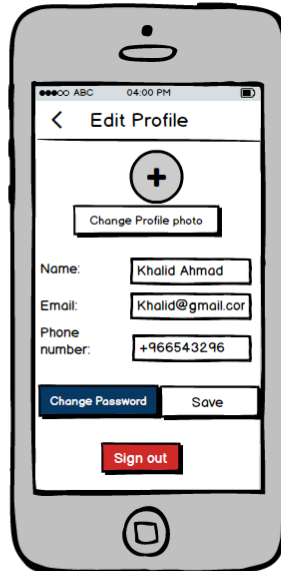

8

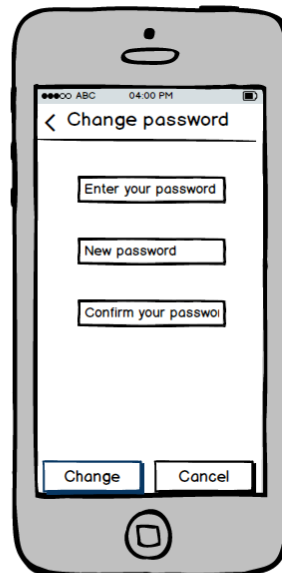

9

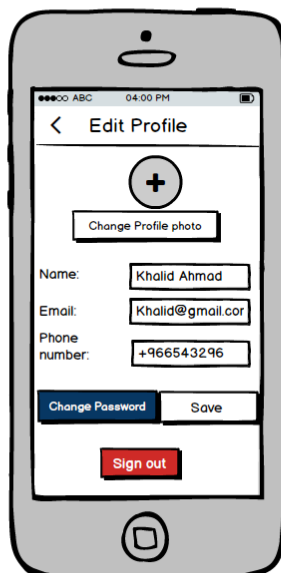

Change password and sign out options will not be shown until driver click on edit pencil

10

11

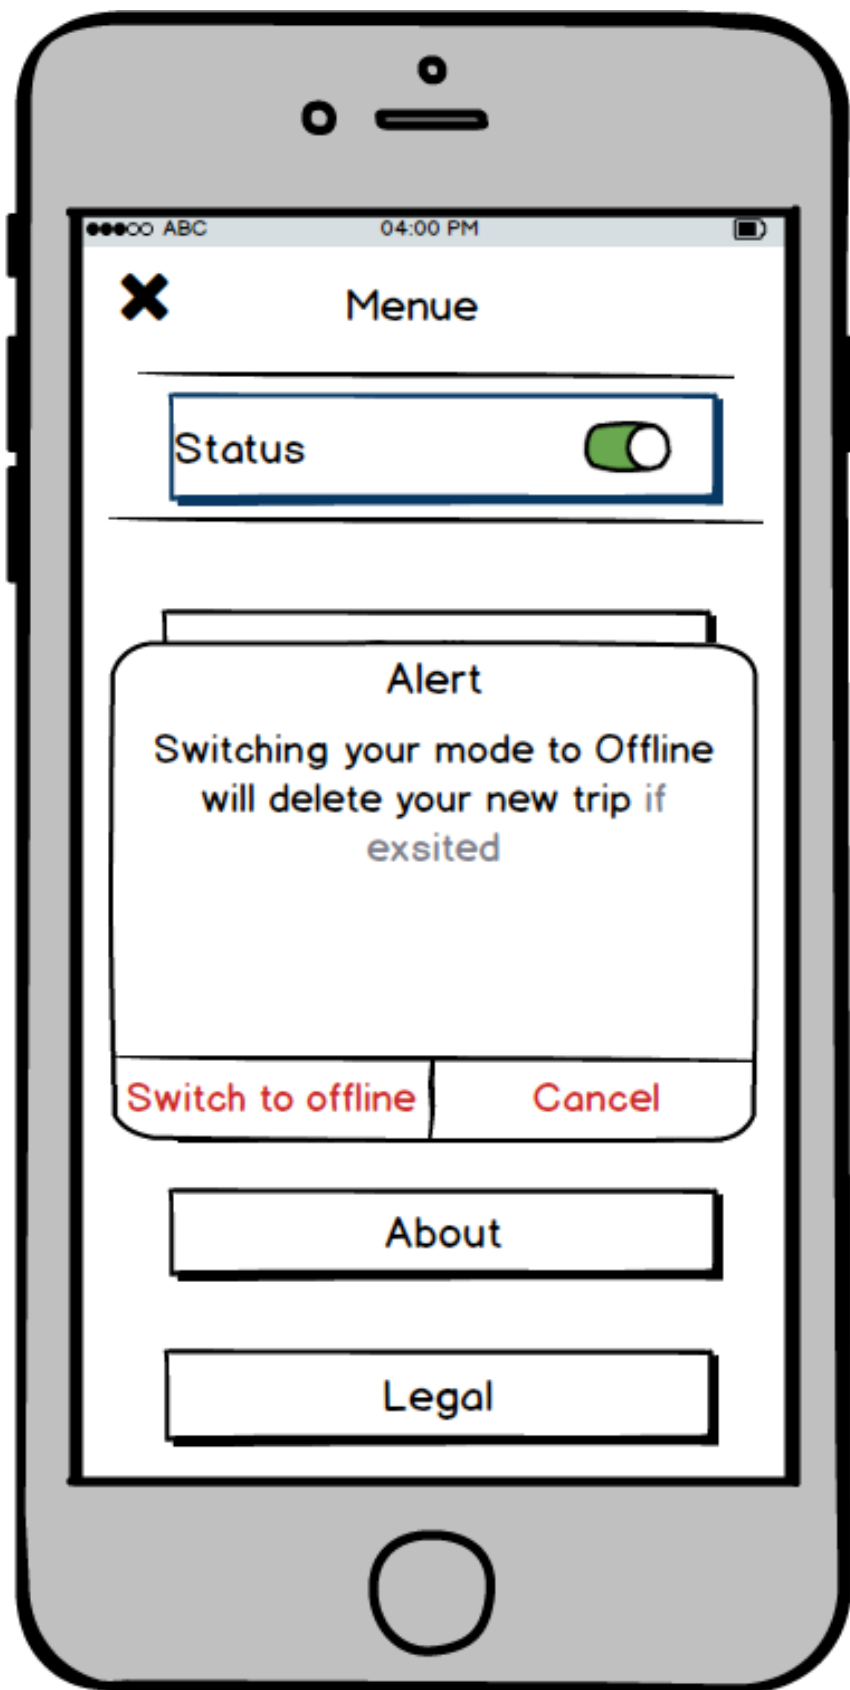

12

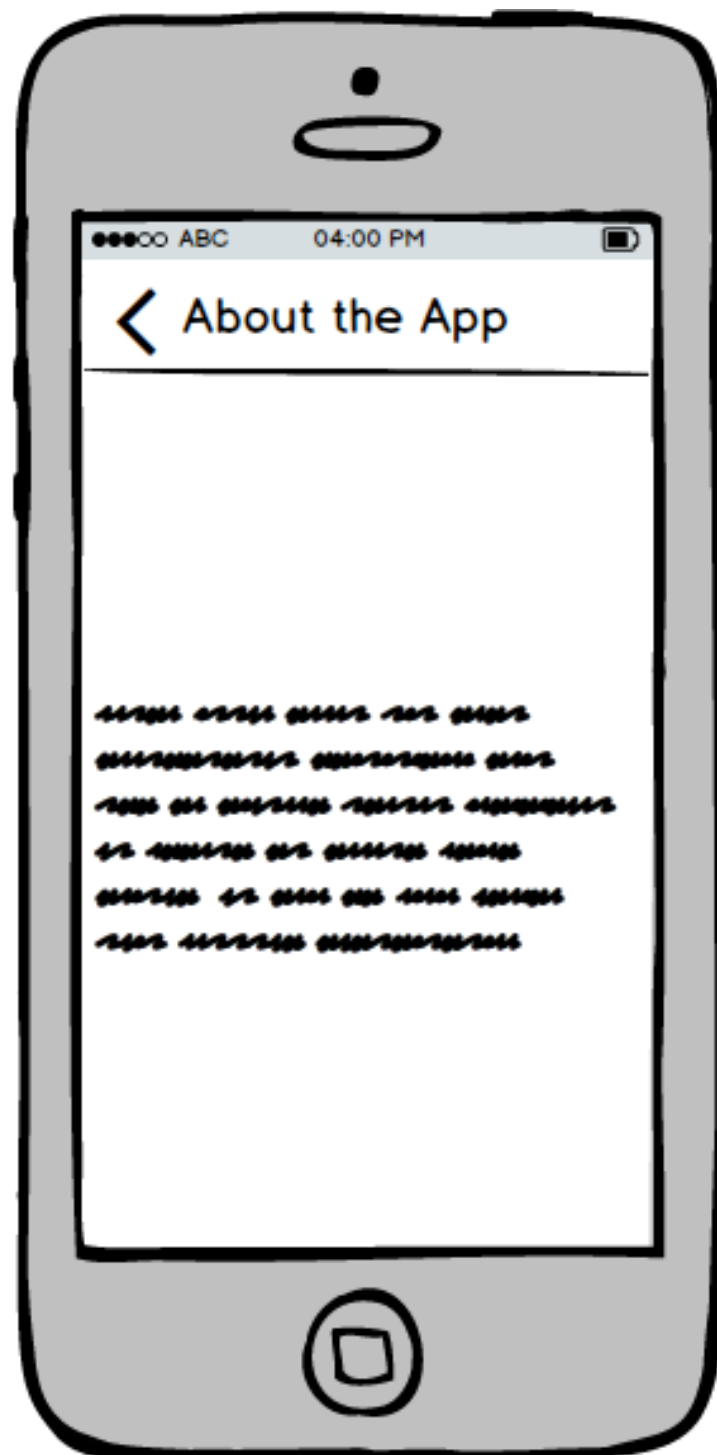

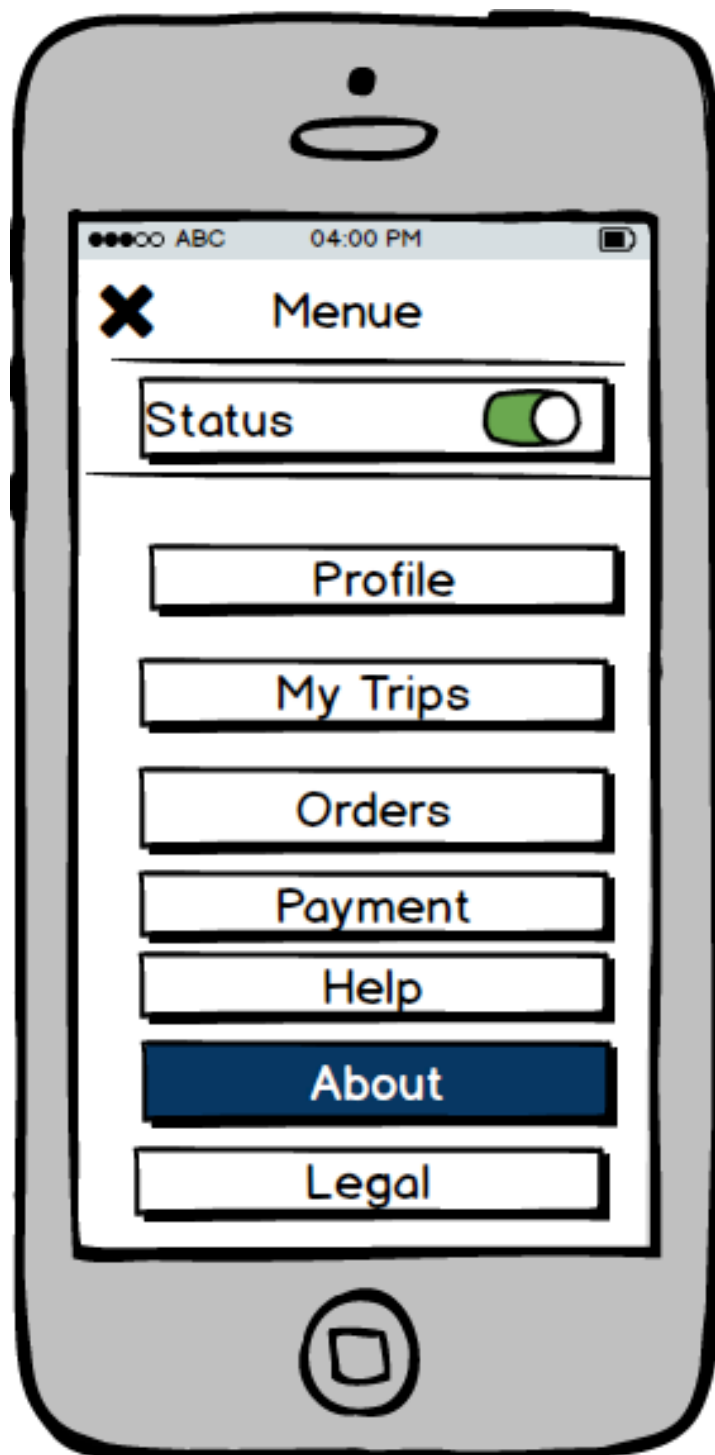

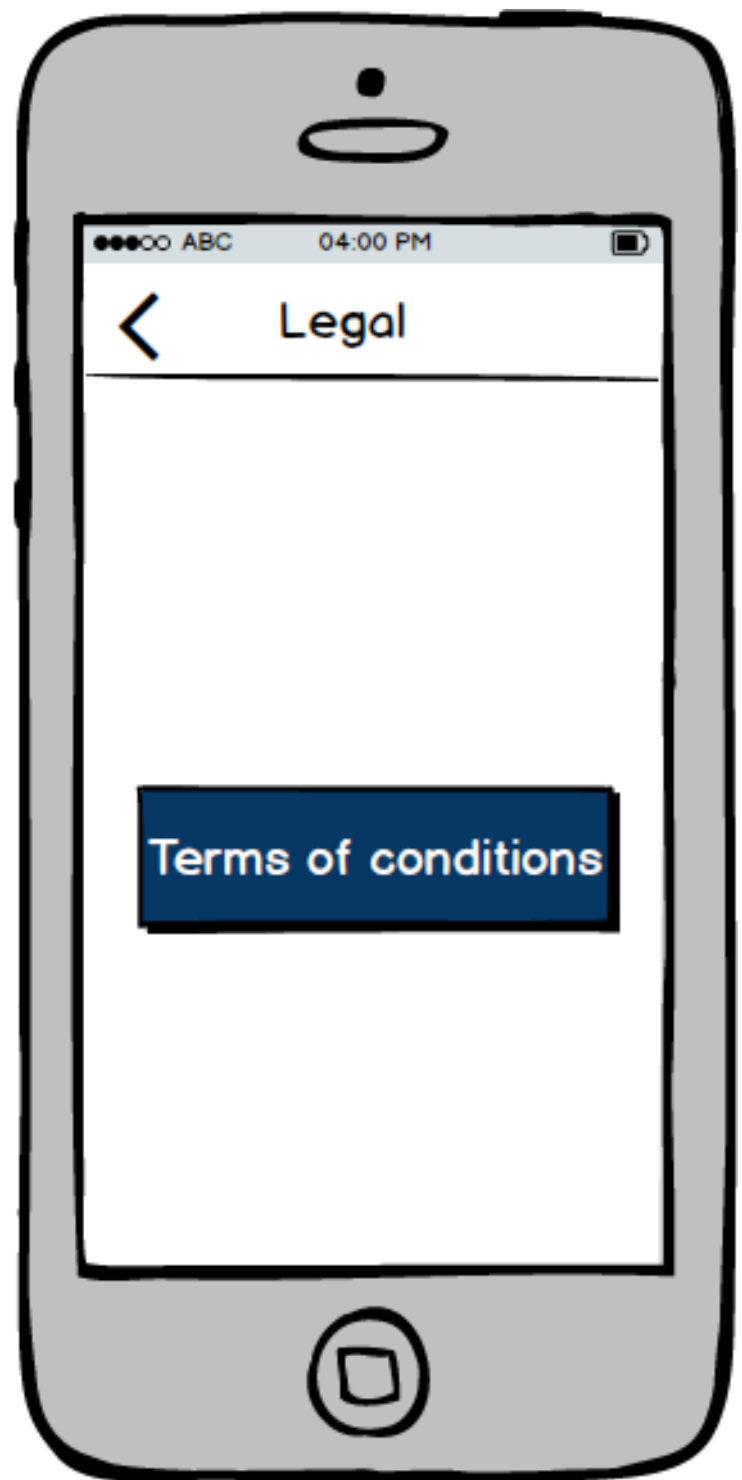

13

If he choose to switch to offline, this means  
the new created trip will be deleted from  
my trips list

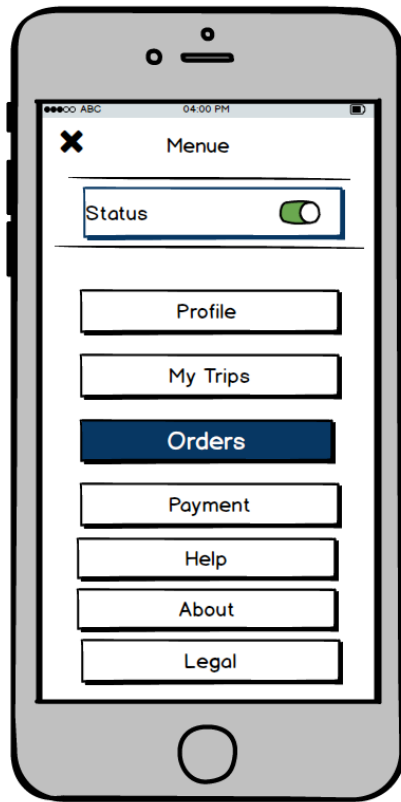

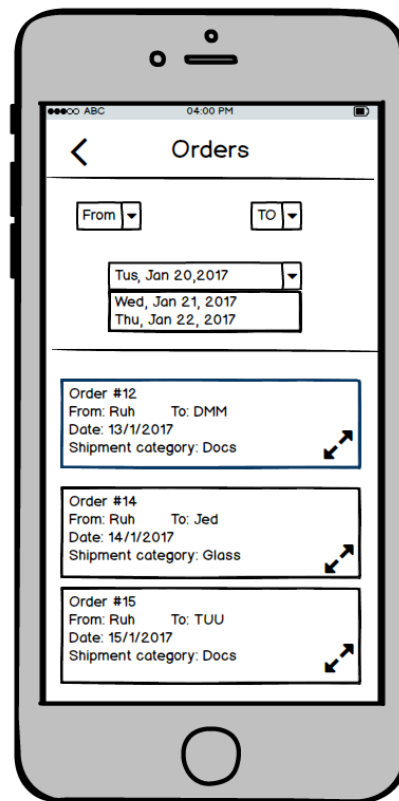

From menu, driver can scroll to view all orders,  
all orders are expandables

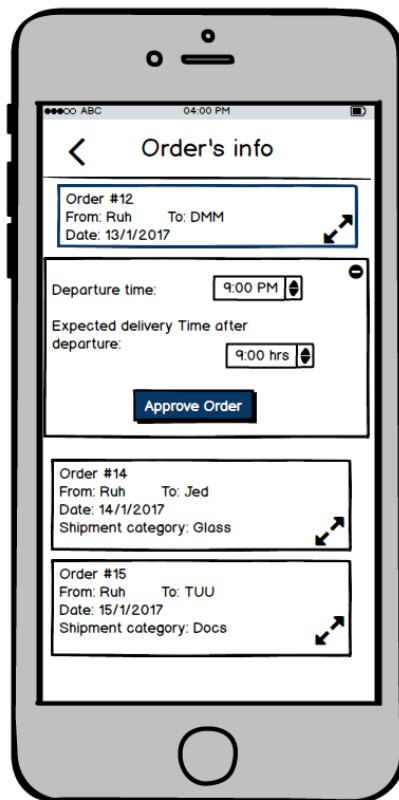

22

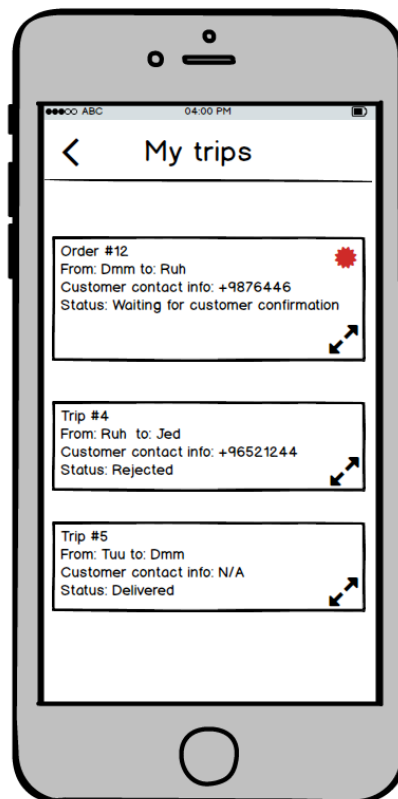

23

once he expanded an order.  
if he press approve, then the approved order will move to my trips from menu bar  
if he doesn't want this order he can minimize it and view the rest orders

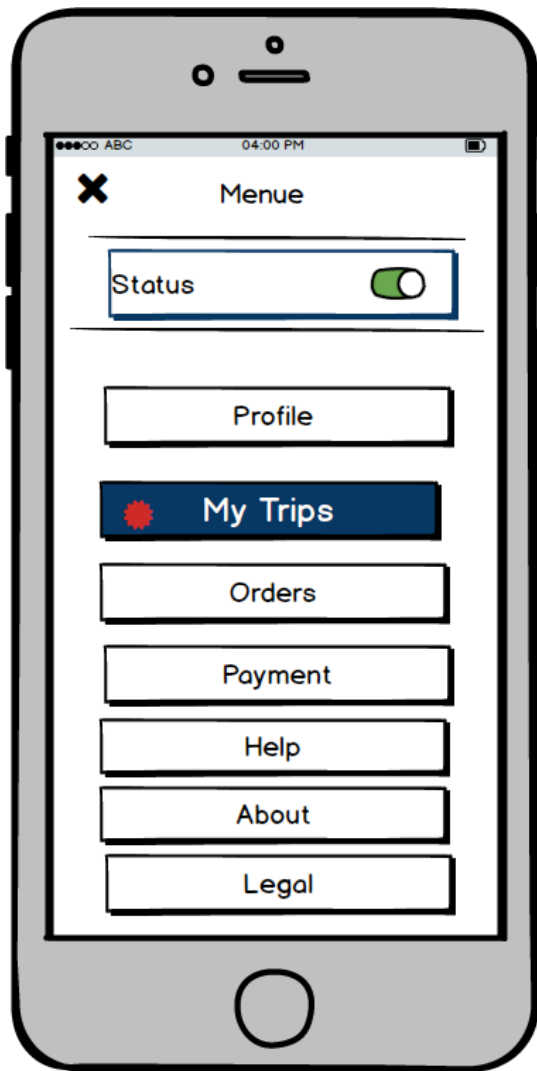

24

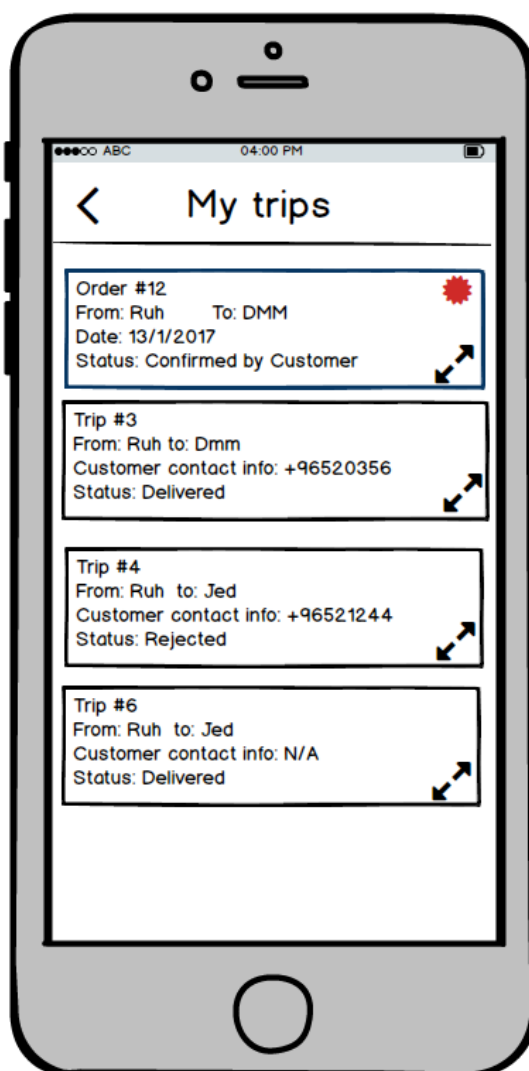

25

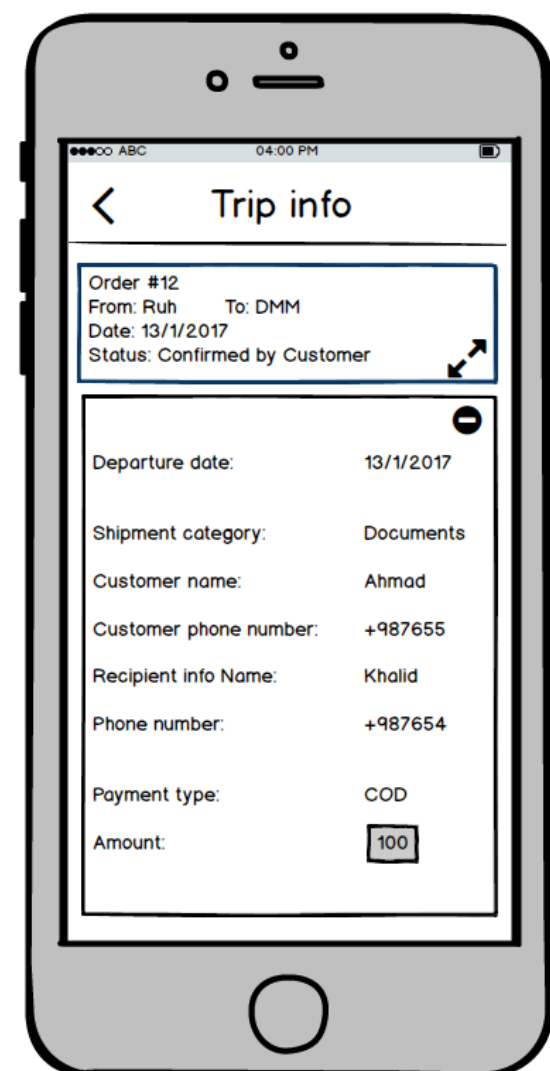

26

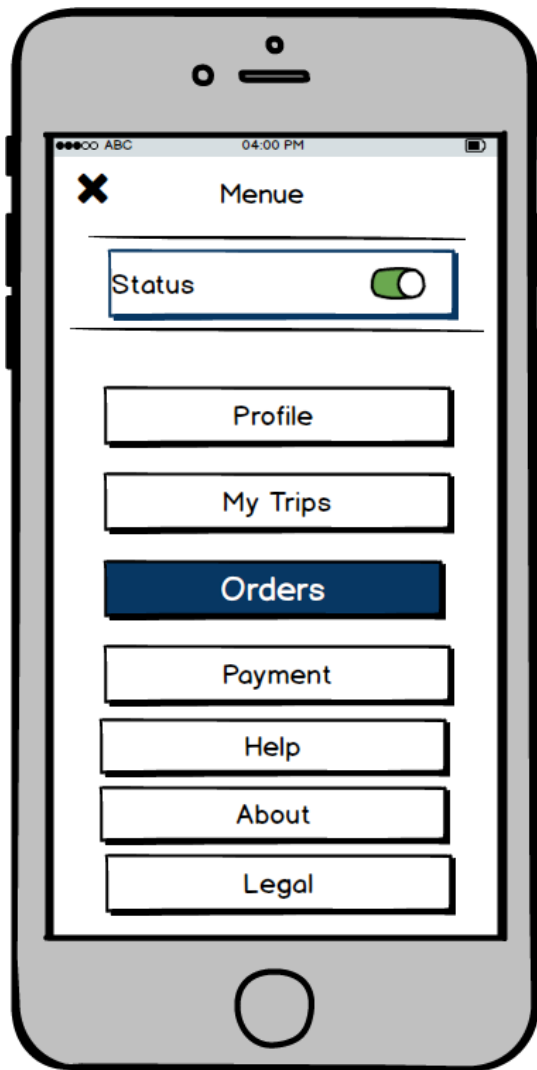

27

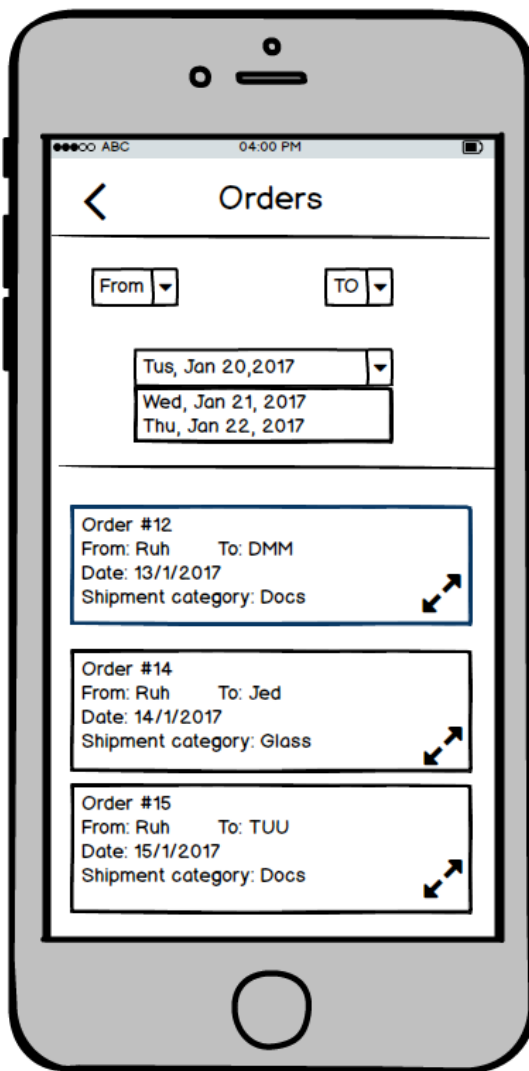

28

Notifications about status

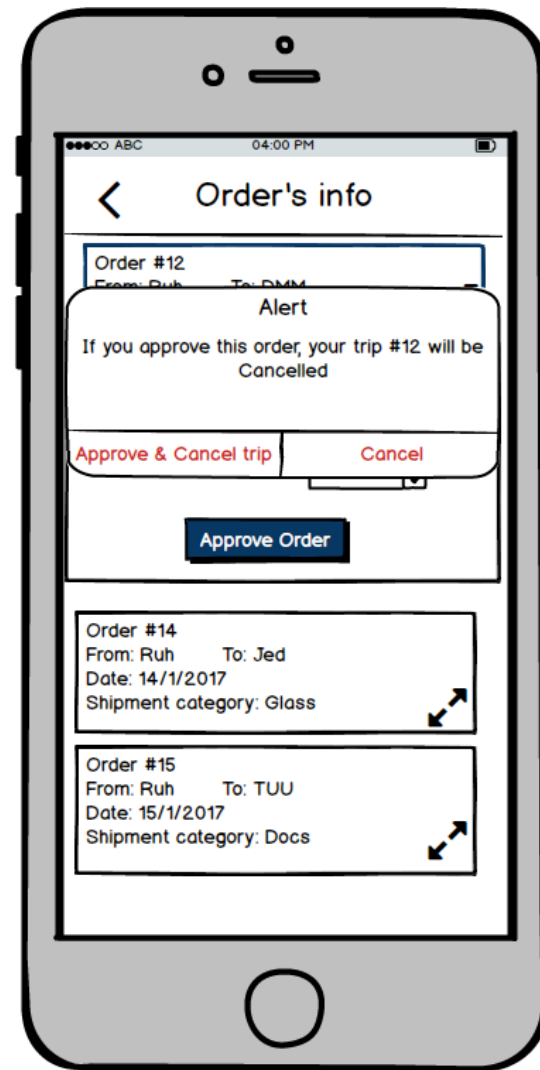

once he click on the notified order, he can see customers info.  
then go back to my trips page

29

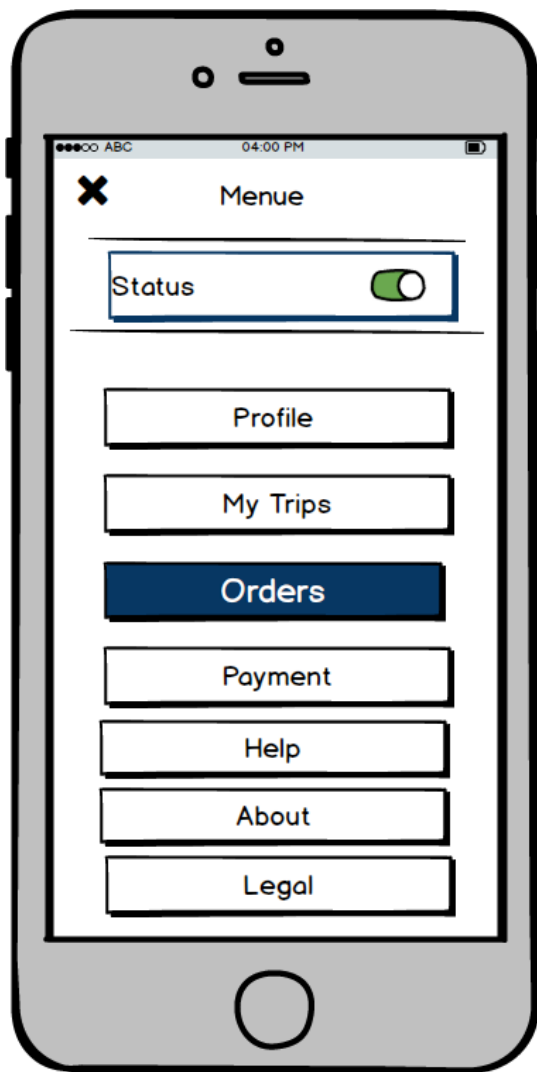

30

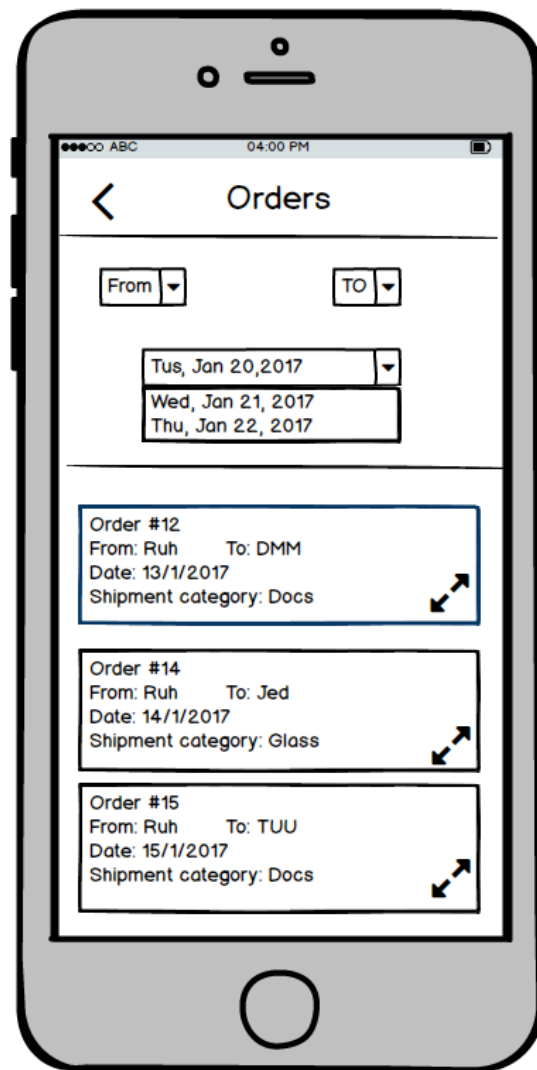

31

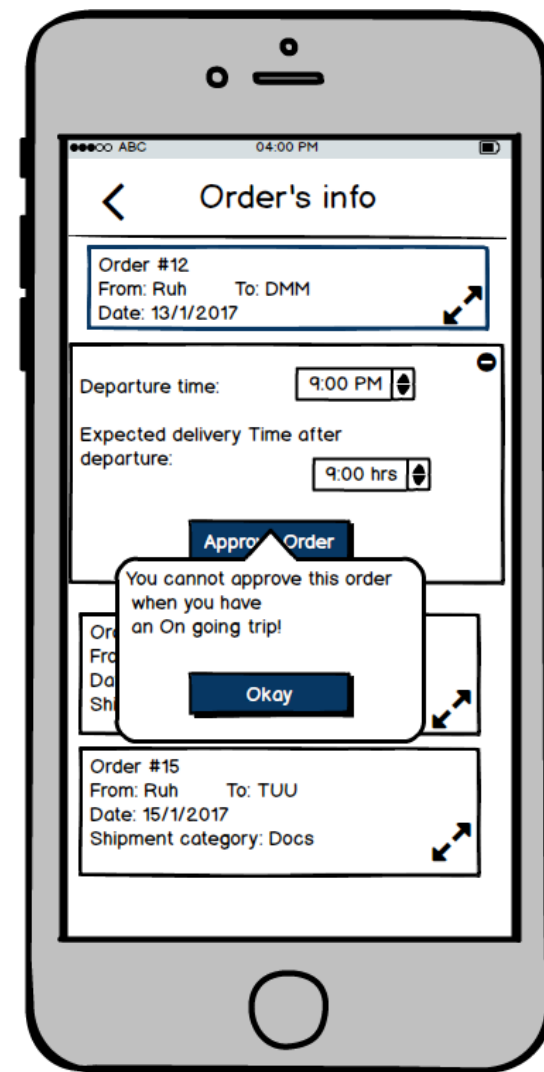

Conflict  
when a driver has a trip online and he wants to approve another order..  
approve & cancel will change the status of trip #12 to cancelled

32

33

34

Another conflict

when there's a trip going on, he cannot approve a new order!

both customer and Driver are allowed to make one trip and one order only

After the trip or the order has reached the final status, Now customers and drivers can create new trip and order

Home screen

Home screen of the Barq app. The status bar shows 'ABC' and '04:00 PM'. The app title 'Barq' is at the top. Below the title is a hamburger menu icon. The main form has two columns: 'From' and 'To'. 'From' has a text input with 'Ruh' and a date dropdown with 'Thu, Jan 22, 2017' selected. 'To' has a text input with 'Dmm' and a 'Departure time' dropdown with '09:30 AM' selected. Below these is a text input for 'Expected delivery time after departure' with '06:00 hrs' selected. At the bottom is a blue button labeled 'Create a new Trip'.

Below these is a text input for 'Expected delivery time after departure' with '06:00 hrs' selected. At the bottom is a blue button labeled 'Create a new Trip'. A white error message box is at the bottom with the text: 'You can not create a Trip when there's a trip Online !'.

37

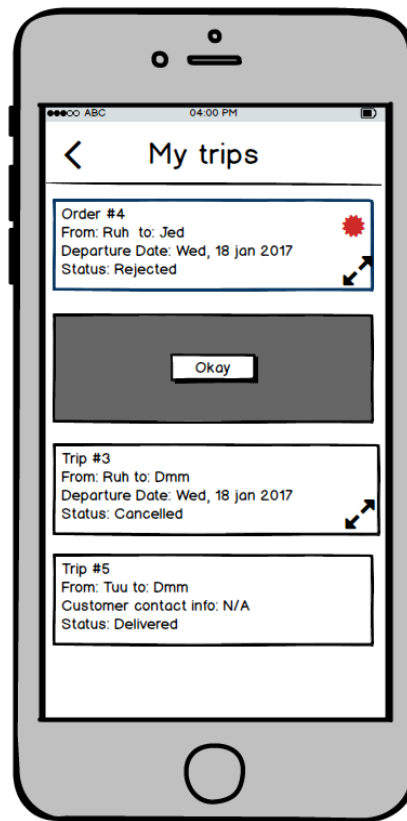

Notice:

Driver has made a trip  
and he wants to make a new one without  
finalizing the previous one, which is not  
allowed
